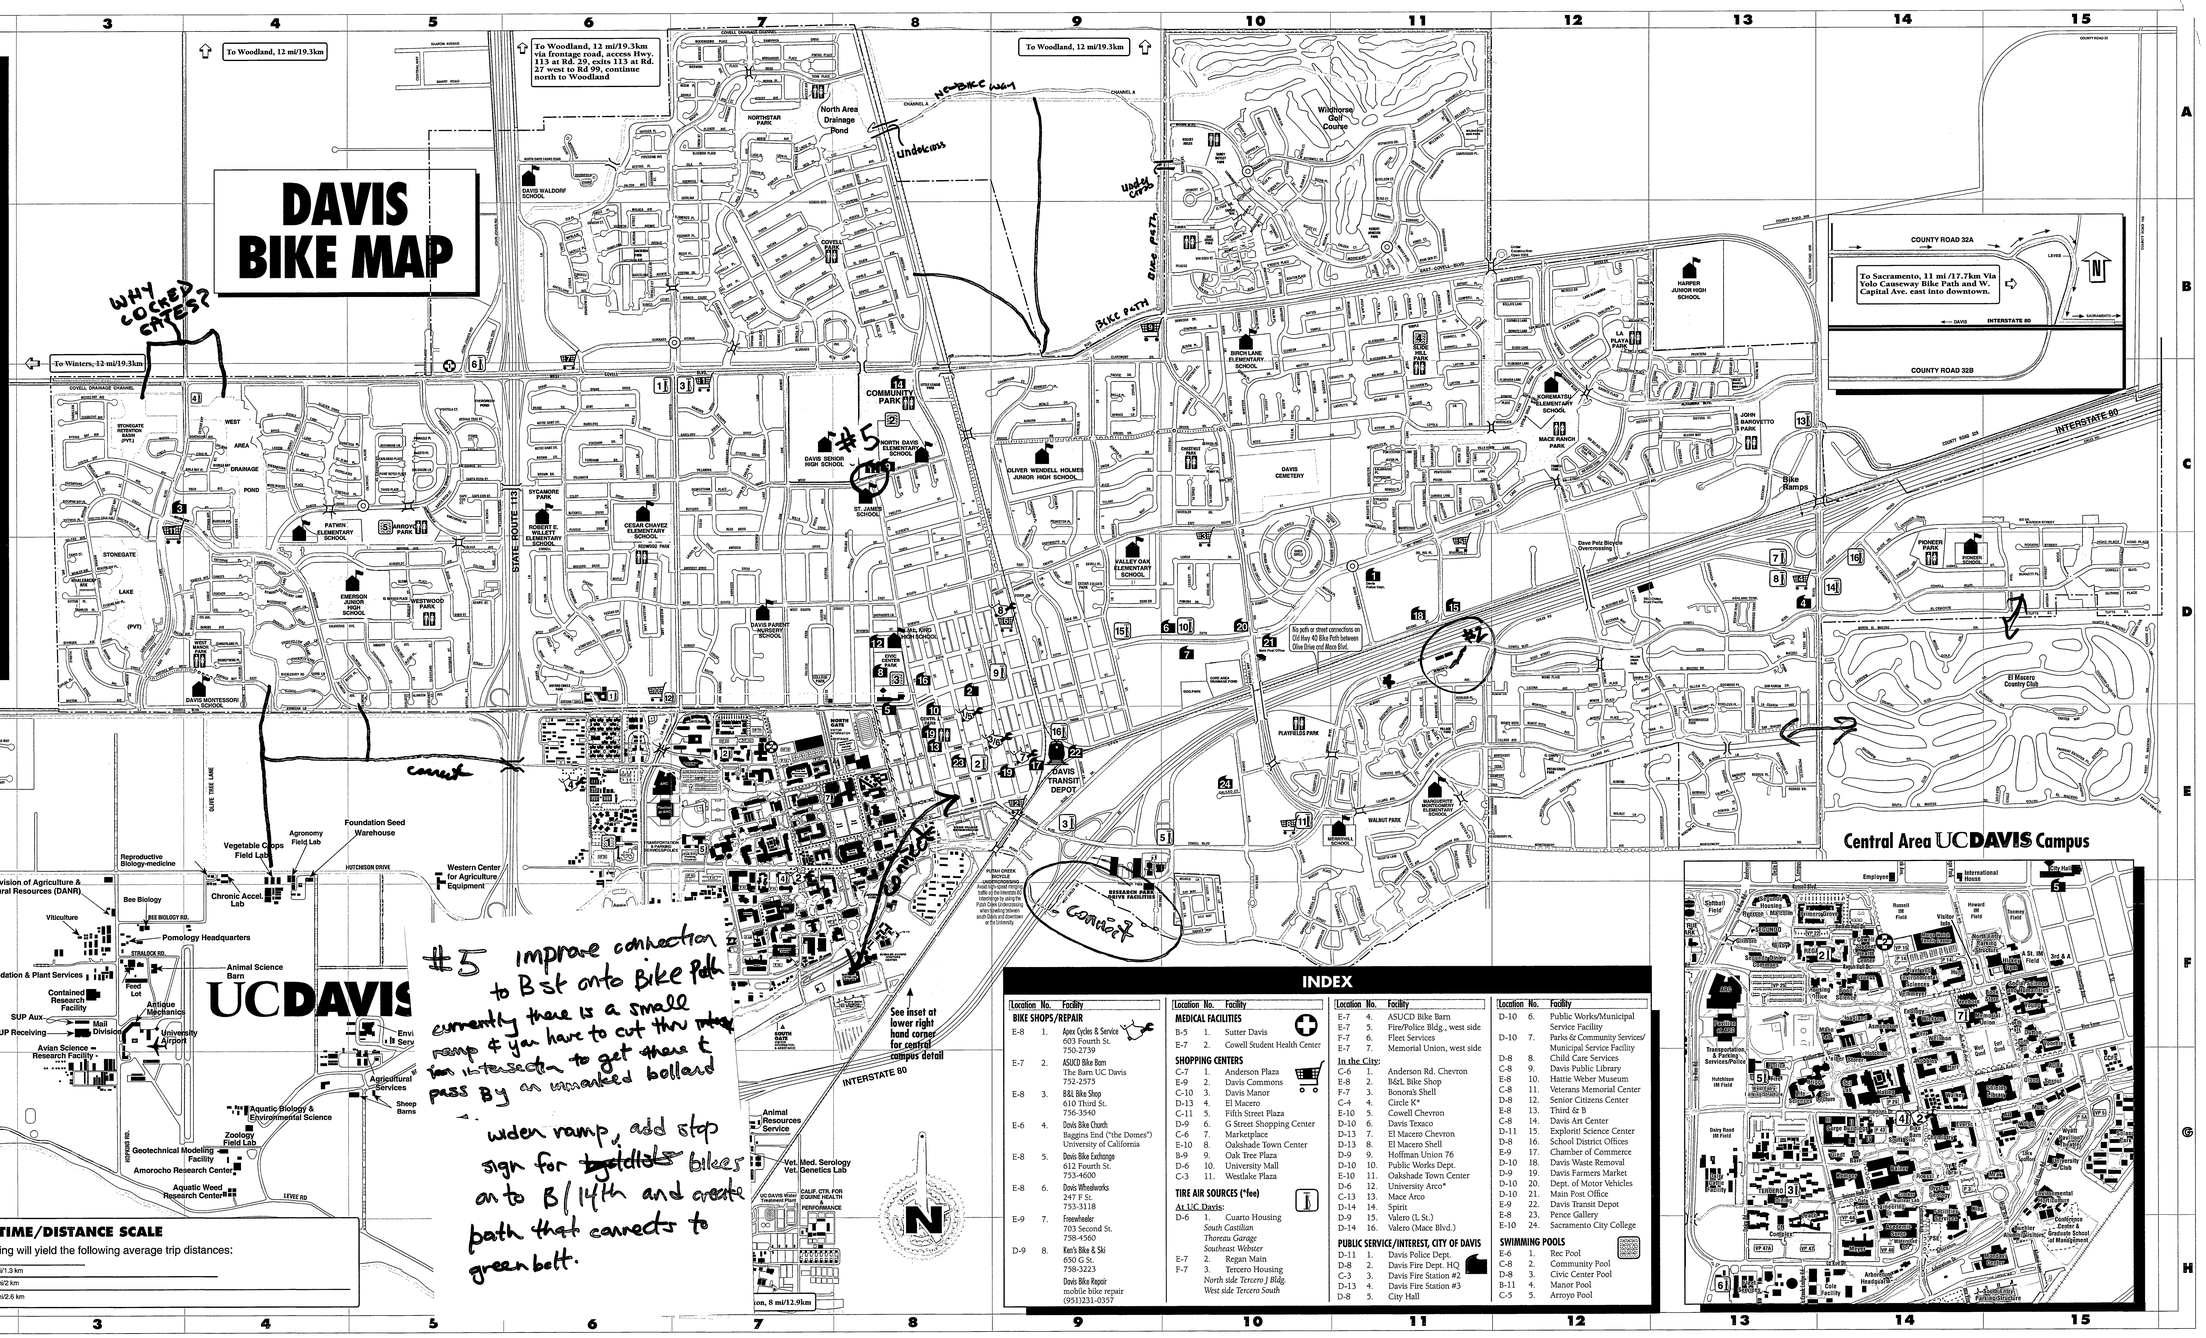
BIKE ROUTE GUIDE

Green Routes are usually streets with marked bike lanes. Dotted green routes are those with-out bike lanes that provide direct connections to streets with bike lanes, bike paths or popular destinations.

Orange Routes are bike paths on which motor traffic is limited. Some are good connections between major streets and destinations and some are more suitable for recreational riding.

Purple Routes are intercity routes for travel to and from Davis. Note that most intercity routes are on rural roads with high–speed traffic and variable shoulder widths

APPROX. SCALE 1"/2.54cm = 1250'/381m
4" = 1 mi/1.6km



To Woodland, 12 mi/19.3km
To Woodland, 12 mi/19.3km via frontage road, access Hwy. 113 at Rd. 29, exits 113 at Rd. 27 west to Rd 99, continue north to Woodland
To Woodland, 12 mi/19.3km
To Winters, 12 mi/19.3km
To Winters, 12 mi/19.3km
WHY LOCKED GATES?
NO BIKE WAY

BIKE PATH
BIKE PATH
connect
connect
connect
#5 improve connection to B st onto Bike Path currently there is a small ramp & you have to cut thru from intersection to get there & pass by an unmarked bollard
widen ramp, add stop sign for bike path on to B/14th and create path that connects to greenbelt.
#2 connect to main path to get to the Peltz overcrossing or have sign at *
