Accessory Structure Development Standards

Purpose

To provide clarification to development standards for accessory structures, Municipal Code Sections 40.01.010 and 40.26.010. Listed below are definitions for various accessory structures, standards, and process.

Definitions

Accessory Building or Structure: A structure detached from a principal building located on the same lot and incidental and subordinate to the principal building or use, including, but not limited to, garages, carports, storage sheds, gazebos, guest houses, and second dwelling units ("granny" units; in-law units, etc.)

Arbor: A detached or attached archway or bower, not fully enclosed on the sides, intended for the use of supporting vines or climbing plants and/or for architectural interest.

Gazebo: A free standing structure, with a solid or trellis roof, usually open on the sides, used for outdoor living and not for storage purposes.

Play House: Structure with no electrical or plumbing connections that is enclosed (either with solid material, screening, cloth, or other material) on three or more sides for the use of children's play. Such structure shall not be used for storage.

Play Structure: Jungle gym, swing set, slide, platform, or other similar unenclosed structure or device intended for the use of children's play.

Shipping Container: Structure designed and intended for the movement of materials over long distances, typically constructed of corrugated steel, and commonly associated with ship, train or tractor trailer shipping. Not permitted in any single family or duplex residential district.

Solid: Enclosure by, or coverage of, 50 percent or more. For the purposes of this definition, coverage or enclosure may be of any material, transparent or otherwise.

Trellis: Patio cover with an open roof (less than 50 percent coverage) which is not enclosed on the sides except for required roof supports.

Performance Standards

All accessory structures must comply with the requirements of the Uniform Building Code in effect at the time of construction.

An accessory structure in any district may only be constructed on a lot containing a principal structure.

Accessory structures, and any accessory uses (including surfaced area for parking) may not exceed 30% of the square footage of the required rear yard.

All enclosed accessory structures larger than 120 square feet in area must either be substantially screened from public view or constructed of materials that are residential in character. Such screening or materials will be subject to review and approval by planning staff during the building permit review.

If Garages or Carports are attached to the house, their required setbacks become the same as the house.

A Conditional Use Permit may be applied for to reduce the rear setback for accessory structures from the required minimum 10 ft to a minimum of 5 ft.

A Conditional Use Permit may also be applied for to increase the height and/or size of accessory structures up to a maximum of 50% of the gross square footage of the primary structure.

Eaves or overhangs of accessory structures are subject to Section 40.27.060 unless noted otherwise.

One side yard shall remain unencumbered to provide access to the rear yard.

Permit Process

The reverse side of this handout indicates which accessory structures require building permits. For further building permit information contact the Building Division at (530) 757-5610.

- Notes:** 1) Zoning standards on individual parcels always override any standards set forth by this accessory structure ordinance.
2) Refer to separate handout for information about 2nd Units and Guest Houses.
