

CITY PROFILE

Davis is a university-oriented city with a progressive, vigorous community noted for its small-town style, energy conservation, environmental programs, parks, preservation of trees, red, double-decker London buses, bicycles, and the quality of its educational institutions.

HISTORY

Founded in 1868, it was originally named Davisville for Jerome C. Davis, a prominent local farmer. The Davisville post office shortened the town name in 1907 and the change was official when the city incorporated in March 1917.

From its beginnings as an agricultural community, Davis is now recognized internationally for its contributions to life sciences, agriculture, veterinary medicine, biotechnology, medical technology and engineering.

Closely tied to the community's history is the University of California at Davis. UC Davis was established in 1908 as

the "University Farm School". The School of Veterinary Medicine was formed in 1948, with Letters and Science added in 1951. Engineering, Law and Medicine were established in the sixties, while the Division of Biological Science and Graduate School of Management came into being in 1970 and 1981 respectively.

LOCATION & TOPOGRAPHY

- Situated in Yolo County, in the Central Valley of northern California.
- Located 11 miles west of Sacramento, 385 miles north of Los Angeles, and 72 miles northeast of San Francisco.

There is unparalleled scenic beauty and many recreational opportunities within a few hours drive from Davis. Sierra Nevada Mountain range lies to the east - Coastal Range to the west. The Sacramento and American Rivers lie to the east along with historic gold country and Lake Tahoe, while to the west are the San Francisco Bay area, the great coastal redwood forest, and the beaches and rugged shores of the Pacific Ocean. The Sacramento-San Joaquin Delta region lies to the south.

Davis sits in the Pacific Flyway, a major migration route for waterfowl and other North American birds. Several wildlife preserves, offering a natural environment, dot the landscape. The Yolo Bypass Wildlife Area - one of the most successful public-private partnerships for wildlife preservation - was

recognized by President Clinton in 1999. It provides habitat for thousands of resident and migratory waterfowl on more than 2500 acres of seasonal and semi-permanent wetlands. Open to the public, the facility provides educational opportunities regarding wetlands and associated wildlife species.

The Central Valley is the agricultural heart of the state and provides one of the most highly developed and integrated agricultural systems in the world. Scientists conduct research in Davis because its physical location allows recreation of nearly limitless soil and environmental conditions. The area surrounding Davis has some of the most productive agricultural land in California, sustaining hundreds of different crops – from rice to tomatoes to almonds. Thus conservation of prime agricultural land through limited urban growth is a priority as part of the city's General Plan. Other directives include resource conservation and the efficient use of energy, open space and water resources. These priorities have garnered Davis international acclaim for accomplishments in recycling; water conservation; and innovative, energy-saving design.

Davis also sits in the eastern portion of the Putah Creek Plain, a major feature of the southwestern Sacramento River Valley. The land slopes at generally less than one percent. Elevations range from 60 feet in western parts of the city to 25 feet in some eastern parts, with an official elevation level of 51 feet. The city limits cover 9.9 square miles.

Flooding. Flood hazards in Davis generally consist of shallow sheet flooding from surface water runoff in large rainstorms. To mitigate this impact, the Public Works Department maintains three main channels and three detention ponds which provide for drainage and storm water detention. Portions of Davis, primarily in the northern section of town, are subject to flooding in a 100-year flood.

Seismic Activity. No earthquake faults run through the city. Davis has suffered no quake damage from quakes occurring on the San Andres fault system to the west or the Eastern Sierra fault system to the east. The office of Planning and Research has placed the Davis area in Seismic Activity Intensity Zone II.

Water. The city's water supply, maintained by the Public Works Department, is drawn from aquifers ranging from 180 to 1,600 feet underground. The system contains twenty-one water wells, one elevated storage tank with a 200,000 gallon capacity and over 170 miles of water distribution pipes. The supply system produces an average of 11 million gallons per day. The normal water pressure is 45 PSI. The quantity of water available has been estimated as adequate to meet the city's projected demand through 2010 (build-out of the General Plan).

Generally, Davis groundwater is very hard and high in dissolved solids. Selenium and nitrates are two primary substances found in Davis tap water. Selenium is a natural element in the soil which may dissolve into groundwater and nitrates are chemicals that may occur from agricultural irrigation and cultivation of the soil due to fertilizers or leaching of water from septic systems. Both selenium and nitrate levels at all city wells are below the maximum standards set by federal and/or state agencies. Long term development of water wells over 1,500 feet deep is planned to improve the aesthetic characteristics of Davis water.

WEATHER

The Central Valley climate can be described as Mediterranean. During the

AVERAGE: Period	TEMPERATURE			RAIN Inches	HUMIDITY		
	Min.	Mean	Max.		4 am	Noon	4 pm
January	37	46	54	3.69	90	73	69

Source: University of California, Davis

hot, dry, sunny summers, temperatures can exceed 100 degrees F on some days, however, more often summer temperatures are in the low 90s. The Sacramento River Delta breeze usually cools overnight temperatures into the 60s. Spring and fall has some of the most pleasant weather in the state. Winters in Davis are usually mild. Temperatures drop below freezing on only a few days. The rainy season typically runs from late fall through early spring and fog season lasts from November through March. Average annual rainfall is about 17 inches.

INFRASTRUCTURE PROFILE

One major advantage of the Davis region is its proximity to major markets. Virtually the entire state of California is within a one-day driving distance. Situated at the hub of several highways, and enjoying a nearby deep-water port, a major airport and transcontinental rail lines – the area enjoys considerable location advantages.

Highways. Interstate 80 and State Highway 113 run through Davis with the junction of these two major roadways siting just outside town at UC Davis. Interstate 5 is 11 miles to the north and 13 miles to the east. The Interstate 505 junction is 14 miles west.

Public Transit. Three transit systems serve the City of Davis. Unitrans provides bus service within the city. Yolobus connects to other cities in Yolo County. Davis Community Transit provides door-to-door demand response service to the general public, seniors and the disabled.

Davis has a strong history of bicycle use and planning. An estimated 53,000 bicycles are in use in Davis and on the UCD campus. An estimated 25% of person trips in Davis are made by bicycle. City planning integrates bicycle lanes and bike paths on city streets and through community greenbelts.

Train.

Davis sits at the junction of the north/south, east/west lines for both the Southern Pacific Railroad and AMTRAK. Capital corridor trains stop at Davis daily for service between Sacramento and the Bay Area. AMTRAK and the Greyhound bus company stop at the historic Southern Pacific Depot, adjacent to the downtown. The city recently renovated the circa 1910 depot building and expanded parking at this facility, pictured at left.

Airports.

Situated 19 miles to the northeast is the Sacramento International Airport. Served by half a dozen major national and international carriers as well as several commuter airlines, it has about 135 arriving and departing

flights daily with about 14,000 passengers. By the year 2005, the airport is forecasted to serve 23,000 passengers daily. Yolobus and a private airport shuttle provide service between Davis and the airport. The Yolo County Airport, five miles northwest of Davis, has a 6,000 foot runway that can accommodate medium-sized corporate jets or private planes. The UC Davis Airport, open to the public, offers general utility services for light aircraft.

POPULATION & HOUSING

Davis' greatest economic and social resource is its more than 62,200 residents. Outstanding professional and technical skills, coupled with progressive and innovative thinking make the population a resource envied in surrounding communities and throughout the State. Davis residents boast the highest level of education in the state with more than 80% of Davis' adult population completing a minimum of one year of college training and more than 60% having attained at least a four-year college degree.

Davis is one of 86 cities in California with a population between 50,000 and 100,000. Based on population size, Davis ranked 122 out of the 474 cities in California in 2000.

Davis is situated in the Greater Sacramento Area which has a plentiful housing supply and an abundance of undeveloped land. Thus the region has some of the most affordable housing in a major metropolitan community in California and nation wide.

Housing prices in Davis are generally higher than the rest of the Greater Sacramento Area. An historical desire for slow growth in the community has contributed to higher home prices. In addition, Davis' excellent quality of life, the low crime rate and a premier local school system create high demand to move into this community.

Davis did see significant new home development during the 1990s. An average of 496 permits were issued annually. However, by June 30, 2001 there will only be about 100 lots left in Davis. Once permits are issued for these lots, Davis will have reached build-out under the current General Plan through 2010.

The limited potential for new development will continue to affect the Davis housing market and its affordability. Further adding pressure to the housing market will be the projected increase in the UCD student population through 2010, of an additional 5,000 to 6,000 students and about 500 new faculty members, plus additional staff.

The housing inventory in Davis consists of approximately 65% single family homes and 35% multi-family units. The high quality of the city's housing stock is due to the resale/retrofit program that requires housing units be inspected and brought to code standards on resale.

The size of an average single family unit increased from 2,100 square feet in 2000 to 2,666 square feet in 2001. The average multi-family unit size decreased from 1,243 in 2000 to 1,045 in 2001.

The primary market area of Davis includes the City of Davis, the adjacent unincorporated golf course communities of El Macero and North

Davis Meadows, and the main University of California, Davis campus.

California Employment Development Department – Labor Market Information Division*

Davis has a highly skilled professional and technical labor force with residents represented at the highest levels of state and national policy decision making. Nearly all of the major administrative agencies for the State of California are represented by Davisites in key positions.

The work force is engaged in a broad spectrum of employment with primary representation in professional, technical, and governmental (managerial and administrative) occupations. This distribution is due mainly to the city's close relationship with the University of California campus and the professional and technical environment the university creates.

GOVERNMENT

Cities are "local" governments, voluntarily formed by and for their citizens, to provide for local self-determination of community issues. The City of Davis is a municipal corporation operating under the general laws of the State of California. It endeavors to create a livable community with a high quality of life through land-use policies that balance the need for housing, jobs, open space and essential services. The city is a legally separate and fiscally independent agency. It can issue debt, set and modify budgets, fees and sue or be sued.

Davis operates under the Council-Manager form of government with a five-member council, elected at large by city residents. The City Manager serves as the administrative head of city government overseeing the departments of Fire, Police, Parks and Community Services, Finance, Planning and Building, and Public Works.

The primary government of the city of Davis includes the activities of the city as well as the Davis Redevelopment Agency (RDA), the Public Facilities Financing Authority, and the Davis Comstock Recreation Corporation. All of which are controlled by and dependent on the city.

The RDA was established to assist in the clearance and rehabilitation of city areas determined to be in a declining condition. The Agency has the same governing board as the city. Its activities are intended to finance capital improvements and economic development to benefit the city. All accounting and administrative functions are performed by city staff. City Councilmembers serve as Directors of the RDA. The City Manager is the Executive Director.

The Public Facilities Financing Authority was established solely to assist in the issuance of certain bonds for a series of Community Facilities Districts for the construction of infrastructure and improvements under the State Mello-Roos Act. The authority is controlled by and financially dependent on the city. Its financial activities are included in the capital projects and fiduciary funds.

The Davis Comstock Recreation Corporation is a non-profit organization established in 1967 to finance the acquisition and improvement of the Davis Municipal Golf Course. The city leases the golf course from the corporation. City management controls and directs the affairs of the corporation and when the lease expires the city will receive title to all remaining assets of the corporation.

Dedicated to citizen participation, the city has fifteen council-appointed commissions that are devoted to various aspects of community life including such elements as planning, recreation, finance/economics, natural resources and university student relations.

As a "general-purpose" city, Davis provides essential frontline municipal services, described below. The city funds these activities through a variety of locally enacted revenues (parcel taxes, user and license fees, etc.) and with state shared revenues (property tax, sales tax, motor vehicle license fees).

Police: Provides a law enforcement system that uses departmental, civic and community resources to protect lives and property of its' citizens.

Fire: In addition to responding to fires, environmental accidents and natural disasters, the Davis Fire Department also offers comprehensive fire safety programs and is the "first responder" in providing emergency medical services.

Parks and Recreation: The City of Davis provides swimming pools, parks, ball fields, greenbelts, bike paths and bike trails. There is one public golf course, two private golf courses and a skateboard park. The city also sponsors many recreational activities for seniors, other adults and youth of all ages and abilities.

Community Services Provides for various programs to promote the physical and social well-being of Davis residents, including operating a Senior Center and Teen Center; child care referral services and funding;

Public Transit , Transportation and Streets: Maintains and improves a coordinated local transportation network system including senior transit, dial-a-ride programs and funding assistance for UNITRANS. Plans for the safe and convenient movement of pedestrians and vehicles on city streets, maintain and repair 155 miles of city streets, 54 signal controlled intersections and 4,983 street lights.

Planning and Development Services: Helps guide the physical and economic growth of the community. Ensures that buildings are safe and that developments improve the city environment and promote economic vitality.

Public Utilities: The city's Public Works Department provides the clean water used by citizens every time they turn on a faucet, wash clothes, or jump into a pool or hot tub. They also provide sewer and drainage services as well as garbage removal and recycling.

Significant city work projects during FY 2000-01 include:

- Construction of new 34,000 square foot Police Headquarters Station in East Davis, at the corner of Fifth Street and Cantrill Drive.
- Improvements to the Community Chambers building – major lighting and accessibility improvements as well as a new video broadcast room.

- Dave Pelz Bicycle Over-crossing, a bicycle/pedestrian bridge over I-80 situated between Mace Boulevard and Pole Line Road scheduled for completion this fall.
- Construction of a four million gallon water storage tank adjacent to Sutter Davis Hospital, is the city's first large water storage facility providing a supplemental supply during emergencies.

- Raising the old I-80/Mace Boulevard Interchange bridge approximately two feet to gain clearance over the free way and railroad.
- Arroyo Community Park adjacent to Patwin Elementary School in West Davis has been expanded to 12 acres and includes a community swimming pool complex and is scheduled to open fall 2001.
- Phase 1 of Walnut Community Park includes landscaping and bikepath system. This park planned for South Davis is 16 acres and will include a community pool and a diving pool. Plans for the pool complex should be completed this year with construction to begin next fiscal year.

- Final planning for new community park space: Mace Ranch Community Park.

The FY 2001-02 budget for the city totals \$97 million. The Finance Department services over 15,000 utility accounts, 5,100 business licensees, 5,000 vendors and manages an annual city payroll of over \$20 million. The city operates on an AS 400, PC-based, totally integrated computer system.

% of General Fund Budget By Department	2000-2001	2001-2002
Council	.4%	.4%
City Attorney	1.3%	1.1%
City Manager's Office	5.3%	5.0%
Finance	4.5%	4.6%
Fire	18%	17.7%
Parks & Comm Svcs	28.9%	30.7%
Planning & Building	10.9%	9.1%
Police	27.2%	29.1%
Public Works	1.8%	1.5%
Capital Improvements	1.7%	.9%

Major revenue sources for the overall city budget include: property tax (12.4%), sales tax (6.2%), service charges (26.6%), intergovernmental revenue (20.3%), other taxes (10.7%) and all other revenues (23.8%). Within the General Fund budget, principal revenue sources are taxes (62.6%), fees and charges (17.9%), intergovernmental (15%), and other revenues (4.5%). Major expenditures in the General Fund are: Police and Fire (48.9%, combined) and Parks & Community Services (27.4%).

The Government Finance Officers Association (GFOA) has awarded the City of Davis a Certificate of Achievement for Excellence in Financial Reporting for its comprehensive annual financial report (CAFR) for the fiscal year ending June 30, 1999. The Certificate of Achievement is the highest form of recognition in governmental accounting, and represents a significant accomplishment by the City.

COMMUNITY

Davis is noted for its desirable quality of life, its seeming small town atmosphere, and an emphasis on parks and open spaces. Twenty-two miles of greenbelts wind their way through the neighborhoods of North Davis and South Davis. Davis' parks contain picnic facilities, ball fields and swimming pools. An expanded Central Park includes a Teen Center and the Davis Farmer's Market. The Davis Farmers Market is held year-round twice weekly on Wednesdays and Saturdays in Central Park. It is a unique grocery shopping experience. In addition to fresh fruits and vegetables sold by local farmers, often organic, attendees can find gourmet foods, live entertainment, specialty products, arts and crafts, and even splash fountains for children's enjoyment.

The Davis community combines the right blend of safe neighborhoods, convenient retail and service establishments, and cultural amenities for a variety of tastes and plentiful recreational activities. There are 31 parks included in the 521 acres of parks, greenbelts and open space areas owned and maintained by the city.

The area offers myriad cultural and entertainment attractions. A Northern California Mecca for artists of many media, Davis features a community-built Art Center, more than two dozen private and public galleries, an annual downtown Street Faire, an exciting collection of unusual public objects d'art and the restored downtown Varsity Theater performing arts and

conference center. In almost any direction one turns, the stroke of the local artist is evident. Demonstrating the city's dedication to art in public places, nearly \$200,000 of publicly owned art can be seen in a walk around downtown Davis.

Galleries like "The Artery", a local artists' cooperative, provide an opportunity for artists to show and sell their work. Longtime downtown anchor, the "Pence Gallery", hosts exhibits year-round and the outdoor performing area is home to music concerts and theater productions. The Davis Musical Theater Company is the west's only full time, year-round, musical theater, company, and the Davis Comic Opera Company stages classic operettas. The quaint Palms Playhouse produces intimate live music concerts with big name stars and UCD Presents brings world class entertainers to the area. More than a dozen major dance concerts are produced in town each year and the UC Davis Drama Department always has a top-notch theater season.

The International House is a haven for foreign visitors, scholars and students with facilities to welcome and serve guests from all over the world.

Sutter Davis Hospital, which was constructed as recently as 1994 and Kaiser Permanente Medical Facilities provide excellent primary and continuing health

care for the residents of Davis. Private clinics and physicians' groups are available to meet a variety of health care needs.

As a university town, Davis has the advantages of a small town coupled with the numerous intellectual, recreational and cultural activities serving a wide variety of interests.

SCIENCE AND INNOVATION

Davis is a town full of innovation. Muir Commons is a 26-home co-housing community experiment in living borrowed from Europe. This complex allows residents to enjoy the economy of community living while retaining the privacy and benefits of individual home ownership. Nearly every week, foreign dignitaries and notables from the United States tour Village Homes – a 240-home, 60-acre development designed in 1975 to recreate a traditional sense of community and to conserve energy and water in the most efficient way possible. Solar water heating and passive space heating designs are incorporated into the design of each home. In addition to open spaces around the homes, there is a large village green, a community day care center, an amphitheater, a pool, and a vineyard. The Village Homes development has been the subject of several national and international television documentaries on the environment and the future.

Addressing the age old problem of teaching science with excitement, the Davis Regional Science Center is a model facility for science centers throughout the country and the world. Serving nearly half the counties in the state of California the center is designed to educate by totally immersing visitors in experiments, thus stimulating questions and education.

Explorit Science Center is a hands-on science museum with informal, year-round programs on math and science for children, youth and adults.

As one of the leading recipients of research funding in the nation, UC Davis offers a number of innovative research programs. They include the National Institute for Global Environmental Change, the planned 47,000 square foot Neuroscience/Neurobiology Center, a statewide 100-year Sustainable Agriculture Plants Program, and the Institute of Transportation Studies.

Throughout Davis and the greater region, a cluster of biotechnology firms have developed building on the expertise and partnerships available on the UC Davis campus and the proximity to the Bay Area biotechnology community.

Several of the biotechnology businesses in Davis include AgraQuest, Inc.; Antibodies, Incorporated; Calgene, Inc.; Cedaron Medical, Inc.; Integrated Surgical Systems, Inc.; Moller International, Inc.; Novo Nordisk Biotech, Inc.; Schilling Robotic Systems, Inc.; and Z-World, Inc.

ELEMENTARY AND SECONDARY EDUCATION

Many residents choose to live here solely because of the quality of the public school system. The Davis Joint Unified School District provides for primary and secondary (K-12) public education in Davis. The student body totaled 8,264 entering fall 2000. Davis students have one of the highest scholastic achievement test scores in the region and an astounding 92% of 1999 graduates matriculated in college.

Davis schools have won numerous awards and recognition nationally and internationally including California Distinguished School Awards and American mathematics Competition Awards. The Davis High School Madrigals have performed at the White House and in Europe.

THE UNIVERSITY

Davis is home to the University of California at Davis. UC Davis is a world class university with such varied attractions as the arboretum along Putah Creek, cultural performances, galleries, and general, medical, and law libraries. The highly ranked University of California, Davis has 26,000 students. Though many students live in Davis and contribute to a low housing vacancy rate, a great number of student's commute from the surrounding communities.

UC Davis has emerged an acknowledged international leader. It is gaining similar recognition for excellence in the arts, humanities, social sciences, engineering, health sciences, law and management. The University occupies 5,200 acres and is the largest physical campus in the nine campus UC system. In addition to more than 100 undergraduate majors, 80 minors, and 70 graduate programs, the university has four professional programs: the School of Law, the Graduate School of Management, the School of Medicine, and the School of Veterinary Medicine, the latter being the only such school in California.

An acknowledged international leader in agricultural, biological, biotechnological and environmental sciences, it is also gaining similar recognition for the excellence of its teaching and research in the arts, humanities, social sciences, engineering, health sciences, law and management. Two years ago, UCD was admitted into the prestigious Association of American Universities. Membership in this group of 62 institutions of higher learning is by invitation only. In 1999, U.S. News &

World Report magazine ranked UC Davis among the top 12 public universities nationwide. In addition, many of the UCD programs ranked in the top 10 nationwide.

More students receive PhD.s in the biological sciences at UC Davis than at any other university in the nation. One out of every 300 Californians is a UC Davis graduate. UC Davis undergraduates persist and graduate at amongst the highest rates of UC campuses. Law school graduates rank among the top 3 of 60 law schools in California in their passage rate of the state bar exam.

More than 150 new varieties of fruits, grains and vegetables have sprung from agricultural research at UC Davis. The strawberry varieties alone represent the majority of strawberries grown commercially around the world. The university's viticulture and enology department has influenced winemakers around the world, and its studio art program is widely regarded as one of the best in the country.

The University Arboretum is home to one of the best collections of dry lands plants in the country, and occupies about 200 acres along the north fork of Putah Creek. The Arboretum contains 2,000 trees, flowers and bushes, including more than a dozen rare or endangered species, and serves as an important teaching and research resource as well as a campus and community open space amenity.

UC Davis has a wide range of diverse offerings in music, drama, dance, the visual arts and design throughout the year. The Department of Music sponsors nearly 100 concerts each year, including those by the University Symphony, Chorus, Chamber Singers, Early Music Ensemble, Concert Band and Electronic Music Studio. The department regularly brings to the campus distinguished professional musicians to perform in concert, and each year hosts a visiting Artist-in-Residence of international reputation.
