

Anderson/Alvarado Roundabout Improvement

The City will be performing major street repairs to the roundabout intersection at Anderson Road and Alvarado Avenue. The work will be completed this summer.

The roundabout will be closed to all traffic for the duration of the project. Detour signs will be placed to show routes around the work site. The work will improve the roundabout with a permanent concrete apron and asphalt resurfacing.

Covell Boulevard Roadway Improvement

The City will also be performing major street repairs on Covell Boulevard to repair the severe subsidence that has occurred over the years. The work will start this summer and will be completed in early fall.

Both eastbound lanes on Covell Boulevard between Sycamore Lane and Anderson Road will be closed for the duration of the project. Westbound lanes will remain open. Changeable Message Boards and detour signs will be placed to provide additional information and show routes around the work site.

The work will consist of removing the existing soil down to 5 feet, treating, replacing and compacting the soil, and then resurfacing the road with asphalt. Additionally, a new water main will be installed along the south edge of the improvement. Connecting the water main to the existing water system in each intersection will require some traffic lane closures and temporary delays.

We appreciate your patience during the road and roundabout closures and inconvenience in using alternate routes. The construction will temporarily increase congestion, noise and dust; however, we will strive to minimize these inconveniences. If you have any questions, please call Terry Jue in the Public Works Department at 757-5686.

For information on changes to bus routes and schedules during the construction, please contact Unitrans at 530-752-BUSS (2877) or www.unitrans.com or contact YoloBus at 530-666-BUSS (2877) or www.yolobus.com.
