

CURBSIDE CART RECYCLING

Curbside residential garbage and recycling collection is an automated dual cart system. All trash and recyclables **MUST BE PLACED** inside the carts. The default sizes are one 95 gallon garbage cart and one 64 gallon split-recycling cart. Call Davis Waste Removal at 756-4646 for a different size (35 gallon or 65 gallon) or an additional trash container (extra charge will apply). An additional split-recycling cart is available upon request at no extra charge.

Curbside trash and recycling collection take place once a week. Place the containers' wheels in the street, against the curb, with the cart opening facing the street no earlier than 5 P.M. prior to the day of pick up. The carts should be 3 feet apart and at least 3 feet from parked vehicles. Collection starts at 7 A.M. Per city code, carts must be removed from the street no later than 7 A.M. the day after pick up. DWR operates as usual on all holidays except Christmas and New Year's Day. Call DWR (756-4646) if you have any questions.

- **WHEELS AGAINST THE CURB**
- **OPENING FACING THE STREET**
- **3 FEET APART FROM PARKED VEHICLES**
- **DO NOT BLOCK THE BIKE LANE OR SIDEWALK**

Please keep all yard waste piles, vehicles and other objects away from the front of the carts so that the trucks can reach them. Please do not place your trash or recycling cart underneath portable basketball hoops—it is difficult for DWR trucks to empty your carts when they are placed underneath. Do not block the bike lane or sidewalk.

Cardboard will be picked up by DWR if it is flattened and stacked next to the recycling cart. Do not force large pieces of cardboard to fit into the recycling cart.
