

RECYCLE

Yolo County Central Landfill

Located at Road 104 and Road 28H north of Davis, the landfill is open Mon-Sat 6:30 am-4 pm and Sun 9 am-5 pm. The landfill offers free recycling during normal business hours for plastic (#1-#7), steel and aluminum cans, household batteries, car batteries, cardboard, used motor oil and filters, latex paint, glass, paper, electronics, PVC pipe, scrap metal and rigid plastics. Call the landfill at 666-8729 for more information.

Davis Waste Removal (DWR)

DWR's 24 hour recycling center is located at 2727 2nd Street and accepts used motor oil and filters, steel and aluminum cans, cardboard, plastic #1 and #2, rigid plastics (plastics #3, 5, 6, 7), glass, paper and scrap metal for free recycling. Call DWR at 756-4646 or visit www.dwrco.com for more information.

CRV Buyback Centers

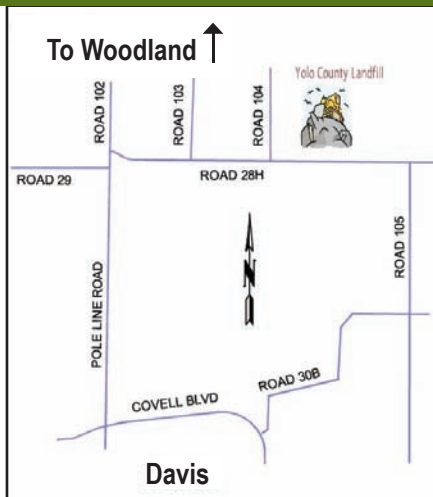

Davis Waste Removal, 2727 Second Street, Mon-Fri 9:30- 2:00, Sat 8:00- 4:00.

TOMRA Pacific Inc. at Save Mart, 1900 Anderson Road, hours vary.

The State of California certifies and provides oversight of privately owned centers which redeem California Redemption Value (CRV) beverage containers. For information about the CRV program or buyback locations, call the Department of Conservation at 1-800-RECYCLE or visit their website: www.bottlesandcans.com.

Construction and Demolition Materials

Construction and Demolition (C&D) materials can be brought to the Yolo County Landfill where they will be sorted and recycled. Call the landfill for more information (666-8729). The City of Davis has a C&D ordinance requiring 50% diversion of materials from applicable C&D projects. Contact the Community Development Department (757-5610) for more information.

THE FOUR R'S

REBUY

Buy Recycled Products and "Close the Loop"

The recycling loop is incomplete until recycled materials are re-manufactured into products and bought by consumers. Therefore it is important to "buy recycled."

Products made from recycled materials consume less energy, use fewer or no raw materials and sometimes cost less. Some examples of products made from recycled beverage containers are: aluminum baseball bats, plastic playground equipment, backpacks, T-shirts, flip flops, etc.

The California Department of Conservation created the Green Gift Guide to help encourage consumers to buy products made from recycled materials. Check out the Green Gift Guide at www.greengiftguide.com.
