

REBUTTAL TO ARGUMENT AGAINST MEASURE H

Statements by opponents of Measure H are false.

YES ON H is fully compliant with the Davis General Plan. It couldn't be on the ballot otherwise.

YES ON H helps our downtown by generating **\$50 million in economic stimulus** annually for existing Davis businesses. New retail space can be built only when there's enough demand onsite to support it, **protecting existing businesses.**

YES ON H will help meet the demand for affordable housing for young families who want to live here. It will also support those families with **millions of dollars for Davis schools.**

YES ON H will attract next-generation research companies providing **high-paying jobs** and **focused on solving the world's greatest challenge, climate change.**

YES ON H advances **some of the most innovative and progressive concepts ever proposed** for Davis. It will:

- Become carbon-neutral by 2040, using **100% renewable energy onsite.**
- Restore and **improve native habitat for threatened species** and **permanently preserve farmland** in Yolo County.
- Implement **23 specific transportation improvements** to make walking, biking and driving easier in South and East Davis and **speed up your commute on Mace Blvd.**
- All of these commitments are legally enforceable in a court of law.

YES ON H opponents **are intentionally misstating the facts** about the environmental benefits, economic advantages and traffic impacts of **Yes on H.** Don't be fooled.

Davis's best days are still to come. We hope you agree. Vote **YES ON H** to advance more of what we love in our great community.
