

City of Davis URBAN FOREST MANAGEMENT PLAN

An Urban Forest Plan is Underway

The City of Davis is working with Tree Davis and the community to develop an Urban Forest Management Plan!

This Plan will communicate the community's vision for the future urban forest and guide the care and planting of trees and growth of canopy cover over the next 40 years.

What is Davis' Urban Forest?

Davis' urban forest is the collection of privately- and publicly-owned trees and woody shrubs that grow within the City.

City trees are a subset of the urban forest and consist of trees on publicly owned lands and rights-of-way including on streets, in City parks, and at City owned facilities.

We Want to Hear from You!

Join in on the discussion to help plan the future urban forest.

- Attend in-person and virtual meetings.
- Share your thoughts on the current urban forest and what you would like to see in the future through an online comment box.
- Celebrate our urban forest by participating in a photography competition.

Interested? Stay tuned to the City's Urban Forestry Division's website at: www.cityofdavis.org/city-hall/urban-forestry (or scan the QR code) for these opportunities.
